

Continuous Miner Cutter Drums

Today, Phillips continues to guarantee accurate attack angles and lateral spacing on every set of cutter drums we manufacture, rebuild or repair. Repeatability, exacting precision, consistency and well balanced drums are the direct result of our state-of-the-art computerized lacing fixture. The complete lacing pattern is stored electronically for every customer's cutter drums for faster turnaround time and guaranteed accuracy. Phillips will custom design and make recommendations on the cutter drums for your specific coal operation and most continuous miners. Our experts can help you maximize production.

- **Fast Turnaround**
- **Guaranteed Accuracy**
- **Repeatability**

Phillips' reputation as a leader in the field of cutter drum design and quality is proven by our many satisfied customers.
